Wood, J.R.G. & Wood-Harper, A.T. Information technology in support of individual decision-making, 85
Wood, J.R.G. *see* Doyle, K.G.
Wood-Harper, A.T. *see* Doyle, K.G.
Wood-Harper, A.T. *see* Wood, J.R.G.

Keyword Index

action reseearch, 119
adoption of innovation, 255
argumentation, 255
axiomatic system, 149

business process redesign, 199
business strategy, 199

clarity, 217
cognitive dissonance, 239
completeness, 217
complexity, 17
conceptual model, 149
conceptual models, 187
culture, 33

data analysis, 169
data base, 119
data base design, 119
decision processes, 255
decision support, 85
decision support systems, 47
decision-making, 85, 239

effectiveness, 239
executive information systems, 239
expressiveness, 217

framing, 255

grammar, 217
group support systems, 47

heuristics, 255

information, 3, 119
information architecture, 199
information management, 33
information requirements determination, 199
information system concepts, 3
information system design, 119, 149
information systems, 85, 103
information systems development, 169, 187, 199
information systems planning, 71
information systems strategy, 199
information technology, 85
IS development, 217
IS strategy, 33

language game, 149
logico–linguistic model, 149

management information systems, 47
management processes, 17
management support systems, 47
meaning, 149
measures of success, 47
mental models, 239
metaphor, 33

ontology, 217
organization structure, 17

performance measurement, 17
planning, 71
politics, 33
private language, 149

SISP (strategic information systems planning), 71

user interfaces, 103
user/machine systems, 103

viable system model, 17
